INTERNSHIP PRESENTATION

AI Business Strategy: Market Analysis, Strategic Roadmap Development & Implementation Planning

STUDENT NAME
Dheeraj Tripathi

ENROLLMENT NO.
CS23411263

PROGRAM & SEMESTER
B.Tech CSE, Semester 7

ORGANIZATION
YuvaIntern

Presentation Agenda

01

Internship Overview

Organization, role & duration

02

Objectives & Scope

What the internship aimed to achieve

03

Weekly Deliverables

Five structured strategy tasks

04

AI Strategy Framework

The conceptual architecture used

05

Key Outcomes & Learnings

Skills gained and results

06

Certificates & References

Proof of completion

Internship Overview

About YuvaIntern

YuvaIntern is a skill-development and internship platform operating in association with Henry Harvin Education, and aligned with the National Skill Development Corporation (NSDC) under its “Reimagine Future” initiative.

The platform provides project-based, industry-relevant internships across domains such as AI business strategy, analytics, and digital marketing — requiring interns to deliver real strategic work every week.

ROLE

Junior AI Business Strategy Intern

DURATION

29 Aug 2026 – 03 Oct 2026 (5 weeks)

MODE

Remote / Virtual

FOCUS INDUSTRY

Retail & E-Commerce Sector

Project Objectives

Five sequential objectives guided the internship, each building strategic depth for AI adoption in retail.

Market Opportunity

Analyze AI adoption trends, competitor strategy and consumer needs in retail.

Strategic Roadmap

Design a phased AI roadmap aligned with business goals and resources.

Business Innovation

Propose an AI-driven solution to a real business challenge.

Performance KPIs

Define measurable KPIs tied to strategic business outcomes.

Implementation & Risk

Build an execution plan with a full risk assessment.

WEEK 1

AI Market Opportunity Analysis

Comprehensive secondary research into AI adoption across the retail & e-commerce industry.

1

Industry & Trend Research

Studied how leading retailers use AI for personalization, chatbots, forecasting and dynamic pricing.

2

Competitor Analysis

Compared AI maturity across marketplaces, specialty e-commerce brands and traditional retailers.

3

Opportunity Identification

Highlighted hyper-personalization, visual search and predictive inventory as key growth levers.

4

Strategic Recommendation

Proposed AI-personalization & forecasting as a low-risk market-entry point for a mid-sized retailer.

WEEK 2

Strategic AI Roadmap Development

A phased, resource-aware roadmap sequencing AI initiatives against business goals.

1

Three-Phase Roadmap

Foundation (0-6 mo), Growth (6-18 mo) and Scale (18-36 mo) phases with clear milestones.

2

Resource Planning

Mapped personnel, technology and budget needs across each phase.

3

Risk & Mitigation

Identified data-quality and adoption risks, paired with training and phased-vendor mitigation.

WEEK 3

AI-Driven Business Innovation Proposal

A concrete AI solution proposal addressing cart abandonment and weak personalization.

1

Problem Identified

High cart-abandonment and low personalization in the online shopping journey.

2

Proposed Solution

An AI conversational shopping assistant with real-time personalization engine.

3

Expected Impact

Higher conversion, lower service costs, and improved customer loyalty.

4

Implementation Outline

A 4-month, cross-functional rollout plan with a phased pilot-to-scale approach.

WEEK 4

AI Strategy Performance Metrics & KPI Design

A KPI framework translating strategic goals into measurable outcomes.

1

Customer Impact KPIs

Conversion uplift, average order value, satisfaction score, cart-abandonment rate.

2

Efficiency & Financial KPIs

Forecast accuracy, service response time, incremental revenue and cost savings.

3

Governance KPIs

Staff adoption rate of AI recommendations and data-quality/compliance scores.

4

Review Cadence

A quarterly review cycle to recalibrate targets as the roadmap matures.

WEEK 5

AI Implementation Planning & Risk Assessment

A full execution plan and category-wise risk assessment for the flagship AI initiative.

1

Implementation Plan

Phase-wise timeline, RACI-style roles, and a detailed budget outline.

2

Risk Categories

Technological, operational, financial and regulatory risks rated by probability x impact.

3

Mitigation & Monitoring

Phased rollout, change-management, contingency budgeting and monthly risk reviews.

The AI Strategy Framework Used

A five-layer conceptual architecture guided every weekly deliverable — from raw data to governed strategic decisions.

Data Layer

Customer, inventory & market data from internal and public sources.

AI/ML Capability Layer

Recommendation engines, forecasting, NLP & computer vision.

Business Application Layer

Personalized marketing, dynamic pricing, automated inventory.

Strategy & Decision Layer

Roadmaps, innovation proposals, prioritization by impact.

Governance & Measurement Layer

KPIs, risk management, compliance & continuous review.

Key Outcomes & Learnings

- Structured approach to industry-focused AI market research
- Ability to design phased, resource-aware strategic roadmaps
- Practical experience turning business problems into AI solutions
- Skill in designing KPIs linked to real business outcomes
- Competence in implementation planning & risk assessment
- Strengthened ability to think and communicate as an AI business strategist

Thank You

Internship successfully completed as Junior AI Business Strategy Intern at YuvaIntern
